In lieu of the official preventive measures that we lack, no one should remain ignorant of the fact that diphtheria is a disease infectious in the bighest degree, and danger may lurk in everything about the patient, The spread of the disease is doubtless due to the lack of thorough quarantining, which, however well enforced by the local authorities, will always be resisted by the families of the afflicted, no matter what happens. One of the late authorities on the subject declares, for instance, that not only should there be complete isolation of the patient while the membrane is present, but children should be kept from school at least four weeks after the disease has disappeared. Where the disease prevails, the mouth, noses and throats of healthy children should be washed with an aromatic antiseptic every three or four hours. Milk tainted, and it goes without saying that everything in the sick room bacilli resist drying and retain their virulence in damp, corners and clothing for months. Careful sanitarians have scraped the walls of rooms in which diphtheritic patients had been, and destroyed every possible source of infection. In ordinary life some of the most simple preventive measures are never applied, while many would consider it an imposition if

treaty stipulations. It is exactly callity. what Canada or England would do if war were designed; but the inverse of that the war vessels disclose a war ment or in the disarmament of her this her geographical isolation, her resources, intelligence, patriotism, and growth, and the idea of a volunthe lakes, but the right to float them | clearly due to an oversight, there would do no harm.

duty is more imperative.

nish an unlimited supply of pure aforesaid. mountain water, and has a wellbedy of farming land in the Mate. Inducing that even in Lee market

rich in mineral wealth. A great immigration is expected along this new line of the Great Northern in the early spring, when the road will be completed to the Pacific coast.

Appropos of the crinoline nightmare suggested by the statements of the tyrants of fashion. Worth and Redfern, it is well to recognize the fact that the period in which they were last worn was the most inartistic in matter of dress in the history of human folly. A few weeks ago, when Benneau and Gallet had completed their opera founded on Zola's "L'Attaque au Moulin," they found that the society costumes of 1871 were so hideous that they could not be put upon the stage. Rather than offend the eye by such an inartistic setting they put the whole plot back to the war of 1815!

REV. DR. LOWERY, of St. Louis, after bitterly attacking the memories of a number of dead people. declared his willingness to go to the is an excellent medium for the growth graveyard, take the deshless jaws of of the baccillus and easily becomes those he had been traducing and shake them till the teeth rattled. Just how this act would tend to raise should be treated with suspicion. The groveling humanity to the benign and saintly plane of Mr. Lowery, those not partaking of his peculiar goodness may never know. But Mr. Lowery was figurative. The only law he will shake much will be his own, an offense only less ghoulish than the proposed grave robbery.

A WYOMING Sheriff, being called upon to arrest a fellow who had pubforced to live up to the severest meth- liely insulted two women, wished to ods of protective hygiene.
